Thin Solid Films, 251 (1994) 159–161

Thin Solid Films

Subject Index of Volume 251

Aluminium
thin films of icosahedral Al–Mn phases; assessment of structural perfection, 14
Aluminium nitride
effect of the substrate bias voltage on the crystallographic orientation of reactively sputtered AlN thin films, 136
morphology and orientation of nanocrystalline AlN thin films, 121
Amorphous materials
hydrogenated amorphous silicon: hydrogen content, bonding configurations and morphology in sputter-deposited, in-chamber annealed thin films, 30
studies of defect states in the interface between SiO_2 and a-Si:H films, 96
Annealing
growth dynamics of polycrystalline Ge clusters formed on surfaces during annealing of co-sputtered Ge–Ag films, 10
studies of defect states in the interface between SiO_2 and a-Si:H films, 96
Antimony
controlled growth of antimony-doped tin dioxide thin films by atomic layer epitaxy, 127
Atomic force microscopy
investigation of anchoring transition of liquid crystals on crown ether monolayers by atomic force microscopy, 40
morphology and orientation of nanocrystalline AlN thin films, 121

Cadmium
correlations between the optical and electrical properties of CdO thin films deposited by spray pyrolysis, 7
Cadmium sulphide
fabrication of CdS nanoparticles embedded in a polymer film by gas–aerosol reactive electrostatic deposition technique, 1
Chemical vapour deposition
tin dioxide thin films prepared by photochemical vapor deposition from tin (II) acetate, 19
triaxially oriented growth of CuO on MgO (001): X-ray diffraction studies of pure CuO films and inclusions in superconducting Y–Ba–Cu–O films prepared by MOCVD, 51
Chromium
effect of heat treatment on the electrical properties of Cr/Cu films, 103
Clusters
growth dynamics of polycrystalline Ge clusters formed on surfaces during annealing of co-sputtered Ge–Ag films, 10
Coatings
liquid-Mn sintering of plasma-sprayed zirconia–yttria coatings, 141
optically switchable thin films: a review, 81
Conductivity
Langmuir–Blodgett film of C_{60}/TTF derivatives, 94

Copper
effect of heat treatment on the electrical properties of Cr/Cu films, 103

Deposition process
controlled growth of antimony-doped tin dioxide thin films by atomic layer epitaxy, 127
fabrication of CdS nanoparticles embedded in a polymer film by gas–aerosol reactive electrostatic deposition technique, 1
influence of deposition rates and thickness on the electrical resistivity and thermoelectric power of thin iron films, 99
tin dioxide thin films prepared by photochemical vapor deposition from tin (II) acetate, 19

Elastic properties
microacoustic characterization of photopolymer crosslinkage, 110
Electrical properties and measurements
correlations between the optical and electrical properties of CdO thin films deposited by spray pyrolysis, 7
effect of heat treatment on the electrical properties of Cr/Cu films, 103
influence of deposition rates and thickness on the electrical resistivity and thermoelectric power of thin iron films, 99
preparation and properties of $CuInSe_2$ thin films produced by selenization of co-sputtered Cu–In films, 116
Electron scattering
Monte Carlo simulation of electron-beam exposure distributions in the resist on structures with high-T_c superconducting thin films, 67
Electronic devices
Monte Carlo simulation of electron-beam exposure distributions in the resist on structures with high-T_c superconducting thin films, 67
Epitaxy
triaxially oriented growth of CuO on MgO (001): X-ray diffraction studies of pure CuO films and inclusions in superconducting Y–Ba–Cu–O films prepared by MOCVD, 51
Etching
morphology and orientation of nanocrystalline AlN thin films, 121

Fourier transform infrared spectroscopy
hydrogenated amorphous silicon: hydrogen content, bonding configurations and morphology in sputter-deposited, in-chamber annealed thin films, 30
vapor deposition polymerization of *N*-methylolacrylamide, 36
Fullerenes
Langmuir–Blodgett film of 1,3,6,11,13,18,28,31-octabromo-fullerene-C_{60}, 4
Langmuir–Blodgett film of C_{60}/TTF derivatives, 94

Elsevier Science S.A.

Gallium antimonide
effect of Gd doping on carrier concentration in InGaAsSb layers grown by liquid phase epitaxy, 147
Germanium
growth dynamics of polycrystalline Ge clusters formed on surfaces during annealing of co-sputtered Ge–Ag films, 10
Grain boundary
copper grain growth in thin film Cu–Cr multilayers, 105
grain orientation of the $YBa_2Cu_3O_y$ superconducting thin films prepared by low pressure plasma flash evaporation technique and its dependence on the starting composition, 63
Growth mechanism
copper grain growth in thin film Cu–Cr multilayers, 105
growth dynamics of polycrystalline Ge clusters formed on surfaces during annealing of co-sputtered Ge–Ag films, 10

Heat treatment
effect of heat treatment on the electrical properties of Cr/Cu films, 103

Impurities
tin dioxide thin films prepared by photochemical vapor deposition from tin (II) acetate, 19
Indium arsenide
effect of Gd doping on carrier concentration in InGaAsSb layers grown by liquid phase epitaxy, 147
Interfaces
studies of defect states in the interface between SiO_2 and a-Si:H films, 96
Ion bombardment
effect of the substrate bias voltage on the crystallographic orientation of reactively sputtered AlN thin films, 136
Iron
influence of deposition rates and thickness on the electrical resistivity and thermoelectric power of thin iron films, 99

Langmuir–Blodgett films
investigations of anchoring transition of liquid crystals on crown ether monolayers by atomic force microscopy, 40
Langmuir–Blodgett film of 1,3,6,11,13,18,28,31-octabromo-fullerene-C_{60}, 4
Langmuir–Blodgett film of C_{60}/TTF derivatives, 94
Laser irradiation
simultaneous formation of titanium nitride and titanium silicide in a one-step process in heterogeneous phase during multipulse laser treatment of a Si wafer with thin Ti coating in superatmospheric N_2, 23

Manganese
liquid-Mn sintering of plasma-sprayed zirconia–yttria coatings, 141
thin films of icosahedral Al–Mn phases: assessment of structural perfection, 14
Multilayers
copper grain growth in thin film Cu–Cr multilayers, 105
simultaneous formation of titanium nitride and titanium silicide in a one-step process of heterogeneous phase during multipulse laser treatment of a Si wafer with thin Ti coating in superatmospheric N_2, 23

Nucleation
nucleation and growth in TiO_2 films prepared by sputtering and evaporation, 72

Optical coatings
optically switchable thin films: a review, 81
Optical properties
correlations between the optical and electrical properties of CdO thin films deposited by spray pyrolysis, 7
non-destructive characterization of the uniformity of thin cobalt disilicide films by Raman microprobe measurements, 45
optically switchable thin films: a review, 81
preparation and properties of $CuInSe_2$ thin films produced by selenization of co-sputtered Cu–In films, 116

Photoconductivity
crystallite orientation and the related photoresponse of hexagonal ZnO films deposited by r.f. sputtering, 151
Physical vapour deposition
vapor deposition polymerization of *N*-methylolacrylamide, 36
Plasma processing and deposition
grain orientation of the $YBa_2Cu_3O_y$ superconducting thin films prepared by low pressure plasma flash evaporation technique and its dependence on the starting composition, 63
Polymers
fabrication of CdS nanoparticles embedded in a polymer film by gas–aerosol reactive electrostatic deposition technique, 1
microacoustic characterization of photopolymer crosslinkage, 110
vapor deposition polymerization of *N*-methylolacrylamide, 36
Pyrolysis
correlations between the optical and electrical properties of CdO thin films deposited by spray pyrolysis, 7

Raman scattering
non-destructive characterization of the uniformity of thin cobalt disilicide films by Raman microprobe measurements, 45
Resistivity
effect of heat treatment on the electrical properties of Cr/Cu films, 103
Rutherford backscattering spectroscopy
non-destructive characterization of the uniformity of thin cobalt disilicide films by Raman microprobe measurements, 45

Scanning electron microscopy
hydrogenated amorphous silicon: hydrogen content, bonding configurations and morphology in sputter-deposited, in-chamber annealed thin films, 30
Semiconductors
effect of Gd doping on carrier concentration in InGaAsSb layers grown by liquid phase epitaxy, 147
Silicides
non-destructive characterization of the uniformity of thin cobalt disilicide films by Raman microprobe measurements, 45
simultaneous formation of titanium nitride and titanium silicide in a one-step process in heterogeneous phase during multipulse laser treatment of a Si wafer with thin Ti coating in superatmospheric N_2, 23
Silicon oxide
studies of defect states in the interface between SiO_2 and a-Si:H films, 96
Sintering
liquid-Mn sintering of plasma-sprayed zirconia–yttria coatings, 141
Sputtering
effect of the substrate bias voltage on the crystallographic orientation of reactively sputtered AlN thin films, 136

hydrogenated amorphous silicon: hydrogenated content, bonding configurations and morphology in sputter-deposited, in-chamber annealed thin films, 30
nucleation and growth in TiO_2 films prepared by sputtering and evaporation, 72
preparation and properties of $CuInSe_2$ thin films produced by selenization of co-sputtered Cu–In films, 116
Structural properties
liquid-Mn sintering of plasma-sprayed zirconia–yttria coatings, 141
nucleation and growth in TiO_2 films prepared by sputtering and evaporation, 72
thin films of icosahedral Al–Mn phases: assessment of structural perfection, 14
Sulphur
effect of Gd doping on carrier concentration in InGaAsSb layers grown by liquid phase epitaxy, 147
Superconductivity
grain orientation of the $YBa_2Cu_3O_y$ superconducting thin films prepared by low pressure plasma flash evaporation technique and its dependence on the starting composition, 63
Monte Carlo simulation of electron-beam exposure distributions in the resist on structures with high-T_c superconducting thin films, 67
triaxially oriented growth of CuO on MgO (001): X-ray diffraction studies of pure CuO films and inclusions in superconducting Y–Ba–Cu–O films prepared by MOCVD, 51
Surface morphology
grain orientation of the $YBa_2Cu_3O_y$ superconducting thin films prepared by low pressure plasma flash evaporation technique and its dependence on the starting composition, 63
morphology and orientation of nanocrystalline AlN thin films, 121
Surface pressure
investigation of anchoring transition of liquid crystals on crown ether monolayers by atomic force microscopy, 40
Surface structure
investigation of anchoring transition of liquid crystals on crown ether monolayers by atomic force microscopy, 40
Tin oxide
controlled growth of antimony-doped tin dioxide thin films by atomic layer epitaxy, 127
tin dioxide thin films prepared by photochemical vapor deposition from tin (II) acetate, 19
Titanium nitride
simultaneous formation of titanium nitride and titanium silicide in a one-step process in heterogeneous phase during multipulse laser treatment of a Si wafer with thin Ti coating in superatmospheric N_2, 23
Titanium oxide
nucleation and growth in TiO_2 films prepared by sputtering and evaporation, 72
Tungsten oxide
optically switchable thin films: a review, 81
X-ray diffraction
controlled growth of antimony-doped tin dioxide thin films by atomic layer epitaxy, 127
copper grain growth in thin film Cu–Cr multilayers, 105
crystallite orientation and the related photoresponse of hexagonal ZnO films deposited by r.f. sputtering, 151
effect of the substrate bias voltage on the crystallographic orientation of reactively sputtered AlN thin films, 136
preparation and properties of $CuInSe_2$ thin films produced by selenization of co-sputtered Cu–In films, 116
triaxially oriented growth of CuO on MgO (001): X-ray diffraction studies of pure CuO films and inclusions in superconducting Y–Ba–Cu–O films prepared by MOCVD, 51
Zinc oxide
crystallite orientation and the related photoresponse of hexagonal ZnO films deposited by r.f. sputtering, 151
